

Lovibond® Water Testing Tintometer® Group

Water Safety Kit Microbiology

Uitgerust voor alle vereisten

You need certainty and reliability for test results in emergency situations or outback in areas without laboratories. The Water Safety Kit Microbiology contains all the equipment necessary to perform the microbiological analysis component for safe drinking water. Due to the heating and cooling function of the DI 20 incubator you can test different sorts of bacteria. You can perform filtration with sterilisable equipment including sampler, filter flask & vacuum pump on-site - sterilisation equipment not included. A backpack is available as an option for this kit to allow ease of transportation.

- Testing coliforms and E. coli bacteria according to WHO standards
- DI 20 with heating and cooling as standard
- Also available as a duo version

Water Safety Kit Microbiology

Take all test equipment with you in one hand or on your back in every situation. This kit includes all you need to determine bacteria directly on-site and monitor the quality of potable water even when you don't have any laboratory nearby. The DI 20 incubator with its unique capability of heating and cooling as standard ensures reliable results.
