

Lovibond® Water Testing

Tintometer® Group

Mini Pooltester Chlorine HR/pH, in blister

The focus on various parameters simultaneously

- Easy to use
- Futuristic design
- RAPID tablets fast dissolving
- Highest accuracy

Part Number: 158010

Inexpensive

The Pool Test Kit is the cost-effective entry-level variant in water analysis.

Variable

The different versions of the Pool Test Kit allow you to test different parameters. Possible combinations are, for example, chlorine + pH, bromine + pH, active oxygen + pH or biguanide (PHMB) + pH.

Ready for immediate use

The Pool Test Kit includes the tablet reagents for 20 tests each and instruction manual, all packaged in a handy and transparent mini suitcase. So you not only keep track of everything, but also have the test kit at your fingertips at any time.

Industry

Marine Industry | Pool Domestic | Pool Services

Application

Disaster Management | Pool Water Control

Mini Pooltester Chlorine HR/pH, in blister
